Course Materials:

The School provides students with manuals that are continually updated to reflect changes in standards, technology and condition. They are organized for easy reference, both in the classroom and later, on the job.

Cancellation Policy:

If, for any reason, The School cancels a course, all registrants will be advised without delay. In such circumstances, a full refund will be given. Liability of The School is limited to refunding the registration fee. If, for any reason, a registrant withdraws from a course, the following will apply:

- Withdrawal requests received prior to 2 weeks of the course commencement date will receive a full refund, less a 15% administration fee.
- Withdrawal requests received within 2 weeks of the course commencement date will be issued a credit for the full amount to be applied to future courses or seminars.

Our Training Facilitators

All of our instructors have many years of experience in their relevant field of expertise. The courses have been developed based on current Codes, Standards and industry rules and regulation.

Our courses are practical, hands on and allow the Student to return to their profession fully equipped with the skills acquired within the courses.

ONTARIO AND NOVA SCOTIA

Loss Control Course Schedule 2010

A-1 Building Construction, Fire Protection & Basic Hazards

This five day course, including examination, will provide you with valuable information on building construction, common fire hazards and fire protection techniques. The practical information derived from this course will improve your understanding of risk analysis and provide you with essential information that you can apply on a day-to-day basis, whether you are involved in claims, underwriting or loss prevention.

A-1 Topics Covered Include:

- Basic Terms and Construction Types
- Heating Systems, Fuels and Controls
- Basic Electricity
- Flammable Liquid Storage and Handling
- Automatic Smoke and Heat Detection
- Introduction to Automatic Sprinklers

You will:

- Learn how to easily recognize construction types based on identifiable features
- Become familiar with heating controls, fuel types and chimneys
- Learn about electricity, wiring and overcurrent protection
- Learn how protection systems control and extinguish fires

Accreditation:

- Insurance Institute of Canada CIP Course C36 *

*Students scoring a mark of **60% or above**, will have to challenge the Insurance Institute examination to get the C36 credit towards their CIP program.

- Insurance Council of BC – 24 hours technical
- Insurance Councils of Saskatchewan
- RIBO – 18 hours technical

Course Dates & Locations:

January 25-29	Dartmouth, N.S.
February 22-26	Markham, ON
March 29-April 2	Markham, ON
June 7-11	Markham, ON
October 4-8	Markham, ON
November 22-26	Markham, ON

Fees: \$875 + applicable taxes – 5% discount/3 or more students

A-2 Special Hazards & Processes

This five day course, including examination, will explain many of the hazards found in industry today. You will review different types of industrial processes, learn how to assess various associated hazards and gain insight into effective methods of protecting against costly losses. The knowledge gained in risk assessment and loss control will assist you in improving underwriting profitability. Those who would benefit most would include fire protection engineers, loss prevention inspectors, insurance underwriters, brokers and risk managers.

A-2 Topics Cover Include:

- Heating and Cooling Equipment
- Static and Lightning
- Basic Fire Alarm Systems
- Dusty Occupancies
- Liquified Petroleum Gases
- Flammable Liquid Occupancies

You will:

- Learn about the use, operating hazards and safeguards of heating and cooling equipment
- See through discussion and demonstration the hazards associated with static and lightning
- Become familiar with the hazards associated with dusty occupancies
- Learn about L.P. gases such as propane including characteristics and hazards

Accreditation

- Insurance Institute of Canada CIP Course C37 *

*Students scoring a mark of **60% or above**, will have to challenge the Insurance Institute examination to get the C37 credit towards their CIP program.

- Insurance Council of BC – 24 hours technical
- Insurance Councils of Saskatchewan
- RIBO – 18 hours technical

Course Dates & Locations:

May 31-June 4	Markham, ON
May 31-June 4	Dartmouth, N.S.
October 18-22	Markham, ON

Fees: \$875 + applicable taxes – 5% discount/3 or more students

A-3 Liability Loss Prevention

This course will improve your understanding of liability hazards and offer solutions to complex and potentially costly liability loss exposures in today's litigious society. You will learn how to protect against unforeseen losses and minimize unavoidable risks. Using case studies, you will learn valuable techniques to help you make informed decisions in your daily work.

- Law pertaining to Liability Insurance
- Legal Relationships
- Exit Requirements
- Manufacturers' and Contractors' Liability
- Products Liability
- Premises Liability

A-4 Crime Loss Prevention

With losses resulting from criminal activity constantly on the rise, insurance professionals must take a proactive approach to crime deterrence. This course will give you an overview of policy coverages and an in-depth review of crime protection techniques.

- Introduction to Underwriting
